Your Company Cybersecurity Self-Assessment Test
Stumptown IT Services ~ info@stumpit.net

Instructions: For each question, check **Yes**, **No**, or **Partial**. Each answer has a weighted score. Add up the points at the end to see your risk level.

Question	Yes	No	Partial	Your Score
Do all employees use MFA?	15	0	7.5	
Are all computers regularly patched/updated?	12	0	6	
Do you use a password manager?	8	0	4	
Is email protected by anti-phishing/anti-malware tools?	12	0	6	
Are backups done regularly and tested?	12	0	6	
Is your network protected by a firewall & secure remote access?	12	0	6	
Do you train staff on security awareness & phishing?	8	0	4	
Are mobile devices & laptops secured/managed?	6	0	3	
Is sensitive client data encrypted in cloud storage?	7	0	3.5	
Do you review user access & permissions regularly?	10	0	5	
Total Score				

Risk Levels:
- **80–100 → Low Risk / Secure**
- **60–79 → Medium Risk / Needs Attention**
- **0–59 → High Risk / Immediate Action Needed**

Do you want or need to improve your score?
Does your company use Microsoft 365, MS Word, or MS Excel?

If yes, you likely already have what you need to improve your company's security.
